

Accessible Parking PDF Addendum

document_id: synthetic_pdf_accessibility_addendum

jurisdiction: synthetic-demo

code_year: synthetic

document_version: pdf-demo-v1

superseded: false

This synthetic PDF addendum is generated to exercise page-aware document ingestion.

PDF extracted accessible parking notes should record the wet-weather transfer path, gradient assumptions, bollard clearance, and signposting continuity before review.

Where an accessible bay depends on a lift or kerb transition, the assumption should remain visible in the access review log.

Stair Discharge PDF Addendum

Stair discharge diagrams in PDF appendices should identify final exits, protected lobby interfaces, smoke separation assumptions, and any pressure-relief note needing specialist review.

The extracted page number should be preserved in citations so reviewers can jump back to the source page.
